

UKLID PLUS PRAHA — Growth Case

Cleaning company forecast for Prague: September 2026 to 2030

A scalable local cleaning company can grow strongly if it combines recurring clients, reliable cleaner capacity, fast WhatsApp conversion, and review-driven trust.

2027 target

1.6–2.5M CZK

20–30 recurring clients

2028 target

3.5–5.5M CZK

40–60 recurring clients

2030 potential

10–14M CZK

100–130 recurring clients

Business logic

- 1 Build demand through the website, Google Business Profile, Facebook groups and Instagram.
- 2 Convert fast on WhatsApp: photos, address, quote, booking, confirmation.
- 3 Sell recurring weekly / bi-weekly cleaning plans first.
- 4 Use deep cleaning, Airbnb turnover and small offices as margin boosters.

Main constraint: cleaner recruitment, retention, schedule discipline and quality control.

Go-to-Market Governance

Use the website as the trust hub, then convert every lead quickly on WhatsApp

Business Plan & Revenue Potential

Base growth scenario, gross revenue in million CZK

*September–December only

Operating model

Pricing

Standard: 350–500 CZK/hour. Deep cleaning and Airbnb: fixed packages.

Margin

Target gross margin: 25–40%, controlled by cleaner cost, travel and rework.

Capacity

Growth assumes cleaner availability, SOPs and a 10–15% operational churn buffer.

Sales focus

Prioritise recurring homes, Airbnb hosts and small offices. Avoid low-margin one-off jobs.

Control

WhatsApp intake, shared calendar, cleaner scorecard, review tracking.

2030 realistic ROI: 10–14M CZK/year gross revenue, if cleaner capacity scales.
